

Pradeep to Pal

✉ pp9775@srmist.edu.in | 📞 9667581819
🌐 github.com/PerseusKyogre09 | 🔗 linkedin.com/in/pradeeptopal

Skills

Languages: Python, C/C++, JavaScript, TypeScript, Java, Rust, Solidity, SQL

Technologies & Tools: React, Next.js, FastAPI, Flask, Node.js, Tailwind CSS, LangChain, Scikit-learn, PostgreSQL, Docker, Appwrite, Supabase, NeonDB, Qdrant, Firebase, Google Cloud, Vercel, Render

AI/ML: RAG Pipelines, Groq API, Google Gemini, Random Forest, Isolation Forest, Vector Databases

Work Experience

HackSkill, Ghaziabad

Apr 2025 - Present

Technical Member

Part-time

- Built the platform's interactive in-browser code editor, reducing code execution errors by **25%** and enabling smoother practice sessions for over **300+ users**.
- Revamped the Product pages by restructuring layouts and implementing a responsive UI, improving load times by **30%** and increasing user click-through by **15%**.
- Optimized frontend rendering and reduced script overhead, lowering interaction latency by **20%** across key pages.
- Collaborated with a 3-4 member technical team to design, test, and deploy new features, improving development cycle efficiency by **10–15%**.
- **Skills:** Python, JavaScript, TypeScript, Web Development, GitHub

Education

SRM Institute of Science and Technology

Jun 2024 - May 2028

B.Tech in Computer Science and Engineering

Relevant Coursework: Object Oriented Programming, Data Structures and Algorithms, Operating Systems, Computer Architecture, Digital Image Processing

Project Work

- **CivicPulse Delhi — Smart Public Service CRM:** Built a full-stack civic complaint management system with 4 role-based portals (Citizen, Manager, Worker, Admin). Integrated Groq AI for intelligent complaint routing and priority classification. Implemented a real-time admin heatmap dashboard for issue density visualization across Delhi zones. Built for India Innovates, organized by Delhi Municipality Corporation.
Technologies: React 18, TypeScript, Vite, Tailwind CSS, FastAPI, Appwrite, Groq AI, Vercel, Render
- **Sentinel-AI — Multi-Layered Zero-Trust NGFW Platform:** Co-Designed a next-generation cybersecurity platform featuring a Dual-ML Pipeline (Random Forest + Isolation Forest) trained on the CICIDS2017 dataset for network intrusion detection. Built a Chrome extension (CyberShield) powered by LLaMA3-70B via Groq for real-time threat intelligence, achieving **high-accuracy anomaly detection** with low false-positive rates. Winner of AICTE-IIC AI Expo.
Technologies: FastAPI, Python, Scikit-learn, Neon PostgreSQL, Redis, LLaMA3-70B, Groq API
- **Leagle AI — RAG-Powered Regulatory Compliance Platform:** Co-developed an AI compliance assistant targeting the \$87B RegTech market. Used Qdrant vector database with LangChain for semantic retrieval over legal/regulatory corpora. Integrated Groq API for context-aware compliance Q&A with source citation, reducing manual compliance review effort significantly.
Technologies: Next.js 15, FastAPI, Qdrant, NeonDB, Groq Multimodal API, LangChain, Python
- **Pokemon Battle Simulator:** Developed a Python-based Pokemon battle simulator featuring turn-based combat mechanics, move effectiveness, stat calculations, status conditions, and battle logic inspired by official Pokemon games and competitive simulators. Implemented modular battle architecture with dynamic damage calculation, move handling, and team management systems for scalable gameplay simulation and experimentation.
Technologies: Next.js 15, FastAPI, PokeAPI, Python

Activities & Leadership

- **Geekroom SRMIST** *Active Member & Event Organizer, 2025–Present*
Organized an AMD Agents AI Workshop and led planning for AI Unplugged, a speaker session in SRM IST Delhi-NCR.
- **Hackathons**
Winner in India Innovates Hackathon in Bharat Mandapam and AICTE-IIC AI Expo. Top 10 in Google AI Forge by GDGoC SRM and AMD AI Reinforcement Learning Hackathon (AMD X IIT Delhi). Participated in hackathons like Vihaan 9.0 (IEEE DTU).
- **GSSoC 2024 — GirlScript Summer of Code** *Open Source Contributor*
Contributed to open source repositories across the program cycle.
- **HacktoberFest 2024** *Open Source Contributor*
Contributed to open source repositories across the program cycle.

Awards and Certificates

- **CS50P: Introduction to Programming with Python**
Completed Harvard's project-based Python programming course, demonstrating strong foundations in algorithms, data structures, OOP, file I/O, testing, and problem-solving.
- **Quantum Computing Program — Womanium x WISER**
Participated in a global program introducing core concepts of quantum mechanics, quantum algorithms, qubits, superposition, and real-world quantum applications.
- **Postman API Fundamentals Student Expert**
Earned certification for mastering API concepts, HTTP methods, authentication, API testing, writing test scripts, and designing requests using Postman.
